Learning without boundaries

Schoology breaks down boundaries by giving educators and students a more effective, efficient, and engaging way to learn. Together. Schoology connects students and parents to learning resources — anytime, anywhere in a safe and secure online environment.

“**Schoology is an amazing product which I believe is a game changer for education.**”

Dave Eisenman, Director of Instructional Technology & Media Services,
Minnetonka Public Schools

Here's how Schoology is changing education:

Schoology expands learning beyond the school day and the classroom walls.

- Increase access to learning resources
- Students and parents are actively engaged in the learning process
- Stronger support networks are forged

Result: Improved student performance

Schoology creates a highly interactive, community-based learning environment.

- Students stay focused on learning because content is delivered in a dynamic, individualized, and engaging way
- Educators connect with their colleagues around the world and down the street — sharing best practices and learning resources through an easy-to-access online library

Schoology is affordable to implement, easy to use, and easy to maintain.

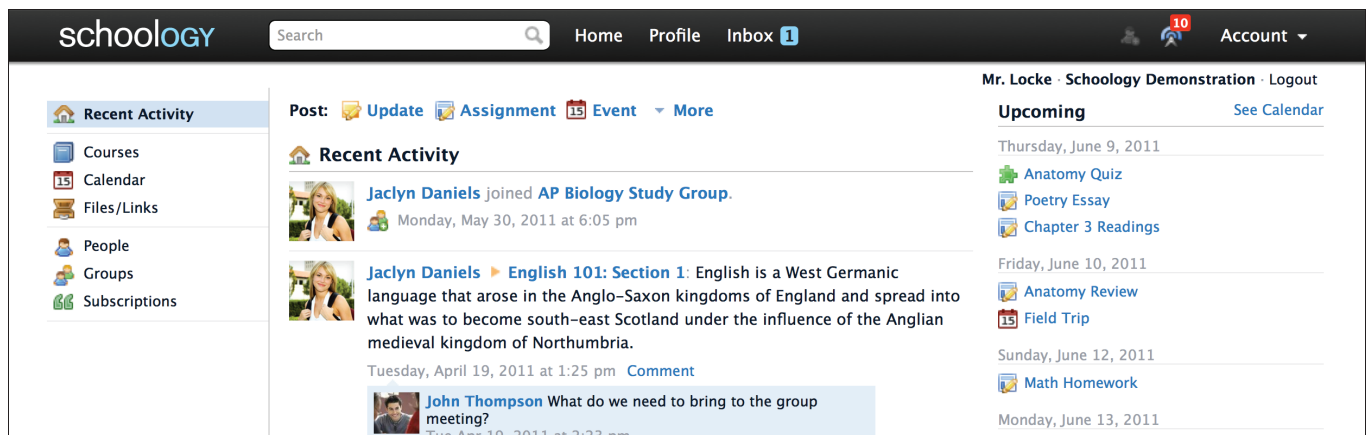

- Schoology is cloud-based — no software to install and no maintenance
- Integrates with any existing school or district technology
- Highly intuitive so no training is necessary
- Educators can seamlessly teach, assess, administer, and analyze student progress

Schoology keeps pace with today's digital learners.

- Schoology leverages all of the benefits and power of social networking in a safe and secure environment
- Students embrace Schoology because it's a familiar and engaging way to communicate with teachers and fellow students, find additional learning resources, and take an active role in their education

Schoology provides education without walls — where communication, collaboration, and learning occur anytime, anywhere.

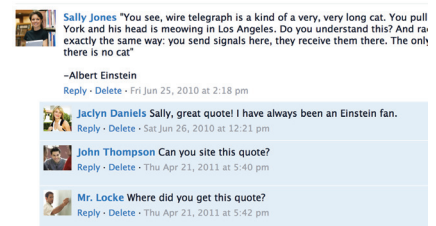

Collaboration & connection made easy

The greatest technology in the world won't improve teaching and learning if it's not used. Schoology offers powerful technology that's easy to use and even easier to implement.

Simple & Powerful

With Schoology, educators can do things as **simple** as posting assignments, quizzes, and links to additional resources, or as **sophisticated** as conducting comprehensive online courses, providing one-on-one remediation, or hosting discussions.

Which plan is right for you?
